Changed parts	Terminal covers, LOTO, Shunt trip devices, Undervoltage, and Auxiliary Switch
Reason for change	To support the transition of new terminal covers with the new Loto for specific semicustomers and make all part numbers unanimous. To have more stock and availability to our customers.
Replacement models	Refer to next page
Transition to changed products	Make sure to deplete any of the old stock of the old gray terminals covers as well as add the existing part number to the transition of 0B795 for our semi customers. As well to make sure all part numbers for Lam ends 0B795 for all products. We can start taking new orders for our new part numbers immediately.
Date of change	3/18/2024
Attachments	Please see the updated part number list for 0B795 accessories.
Others	The "-0B795" part numbers are exclusive to our semiconductor customers and are not intended to be used by other customers. This change will not affect the form, fit, or function of the product.
